Hawai‘i Going Home Plus Project: Making The Move From the Facility To The Community

**OVERVIEW AND PURPOSE**

The purpose of this project is to transition individuals from hospitals, nursing facilities, and ICF-MR facilities to community settings. The project will help individuals currently institutionalized, including the elderly, medically-fragile children, and youth and adults with disabilities who express a choice of community living.

**STAKEHOLDER GROUP**

- Living in a Facility for 6 Months or Longer
- Receiving Medicaid

**ONE-TIME TRANSITION SERVICES**

- Housing Locator
- Housing Deposits
- Utility Hook-ups and Deposits
- Furniture & Appliances
- Moving Assistance & Expenses
- One-Time Cleaning
- Initial Food Stocking

**SERVICES IN THE COMMUNITY**

- Transition Coordination
- Case Management
- Nursing and Medical Services
- Personal-Care Assistance
- Environmental Modifications
- Habilitation
- Adult Day Health
- Home-Delivered Meals
- Counseling and Training
- Transportation
- Personal Emergency Response System
- Medical Equipment and Supplies
- Telemedicine
- Respite

**HOUUSING OPTIONS IN THE COMMUNITY**

- Own Home or Apartment
- Public or Subsidized Housing
- Licensed/Certified Residences (1-4 persons)

**EVALUATION**

The Hawaii Going Home Plus evaluation is intended to test whether the project can:

1) Support medically challenging, long-stay facility residents who move back to the community
2) Increase the number of individuals in living community settings rather than facilities
3) Improve participants’ quality of life

---

This 5 year project, beginning in 2007, is funded by a Centers for Medicare and Medicaid Services Money Follows the Person Rebalancing Grant. The project is a collaborative effort between the Hawaii Department of Human Services Med-Quest Division, University of Hawaii Center on Disability Studies, and its community partners.
