An Invitation to Students with Disabilities Interested in
STEM (Science, Engineering, Technology, and Math) Fields

The Pacific Alliance (www.cds.hawaii.edu/pacificalliance/) invites O‘ahu high school students and college students at the University of Hawai‘i at Manoa, Windward Community College, Honolulu Community College, and other Community College campuses to join our support network to increase interest in STEM fields.

The Pacific Alliance wants to assist students with disabilities interested in STEM fields, science, technology, engineering, and mathematics to succeed in high school, college and graduate programs.

A stipend may be available to help eligible high school and postsecondary education students achieve success in STEM education.

If you are a student with a disability and are interested in support in subjects such as math, chemistry, biology, and other science and technology fields, the Pacific Alliance may be the group for you. A few activities we can help with include:

- Connect high school students, undergraduate, and graduate students with disabilities to available community STEM resources;
- Connect students to mentors;
- Provide training on assistive technologies;
- Provide guidance on accommodation needs and self-advocacy skills;
- Provide tutoring support;
- Increase STEM awareness for career goals.

If interested in learning more please contact: Steven E. Brown (sebrown@hawaii.edu) at 808-956-0996, Kay Gushiken (kayg@hawaii.edu) at 808-956-5503, or Kiriko Takahashi (Kiriko@hawaii.edu) at 808-956-4457.
