HYDROLOGICAL CYCLE

1. Which process in this picture happens the least in your ecosystem?
   ____________________________________
   ____________________________________
   ____________________________________

2. Draw the hydrologic cycle below for the ponds at Puala’a. Include and label the energy input, forms of precipitation, water movement and sources.

   Missing Labels:
   Solar Energy
   Net Movement of Water
   Vapor by Wind
   Precipitation
   Evaporation
   Evapotranspiration
   Runoff
   Ocean
   Runoff and groundwater
   Percolation in soil
